SKILLS

Machine Learning
Web Development
Data Science & Analytics
Algorithms & Data Structures
Object-Oriented Programming
Financial Modelling
Public Speaking

TECHNOLOGIES

LANGUAGES

Java • Python • C++ • C#
SQL • Matlab • Solidity

FULL STACK

JavaScript • NodeJS • React
Angular • Mongo • AWS • .NET
Flask • HTML5 • CSS3 • jQuery

MACHINE LEARNING

Tensorflow • Scikit-Learn • Keras
Jupyter Notebook • Pandas • D3

SYSTEMS

OSX • Linux • PC • Git • Bash

EDUCATION

WESTERN UNIVERSITY

BESc - Software Engineering
April 2021 | London, ON

*Advanced Entry Opportunity to
Ivey Business School for an
Engineering & Business Dual Degree*

COURSEWORK

Algorithms (UC San Diego)
Machine Learning (Stanford)
Deep Learning (Google)
Intermediate C++ (Microsoft)

AWARDS

1st/400 Hack NYU (Startup)
1st/130 Waterloo EngHack (ML)
1st/130 Shopify Case Competition
4th/35 Western Engineering Comp
Finalist /55 Airbnb Consulting Comp
Semi-Finalist /340 1220 Case Comp

ACTIVITIES

Private Pilot License Candidate
RHHS Varsity Soccer Captain
Grade 6 OSA Referee & Mentor
Canadian National Lifeguard
RCM Grade 8 Pianist

EXPERIENCE

FIRMWATER INC | Full Stack Software Developer

May 2018 – Present | Toronto, ON

- Crafted a **React & RESTful API** system with the **JavaScript** module pattern to automatically charge clients which cut monthly accounting time by 32%
- Deployed custom Youtube player in a **.NET MVC LMS** (e-learning platform)
- Created **Node backend / SQL** stored procedures for various SaaS products

WESTERN UNIVERSITY | Machine Learning Researcher

June 2018 – Present | London, ON

- Working under Prof. J Yang to perform **topology optimization** on hyperbolic acoustic metamaterials using a pixel-wise **image segmentation** method
- Implemented a **convolutional neural net** in **Tensorflow & Keras** that correctly optimized macroscopic quantum wave propagation with > 99% accuracy

DEVU 📄 | Co-Founder & Lead Engineer

February 2018 – Present | Toronto, ON

- Launched a **MEAN stack** job board w/ an INSEAD Startup Professor mentor
- Engineered **rule-based elasticsearch** algorithm to save HR 90 minutes / hire
- Guiding 3 developers to create a **Word2vec** model for resume classification

NORTH SOUTH MANAGEMENT | Business Data Analyst

January 2018 – April 2018 | Toronto, ON

- Performed strategy pitches for TSE: BEER to bolster upcoming IPO value
- Reduced retail predictive model error by 40% with **PCA & ridge regression**
- Advised niche wine production (8% CAGR) via **sklearn feature engineering**
- Clustered 5000 product reviews with **tf-idf & k means** to drive sales strategy

PROJECTS

OURBLOCK 📄 | Python / Solidity

- **Ethereum** crime auditing system connecting civilians with police on **AWS**
- Trained **Tensorflow** crime classifier / filter using **bag-of-words & stemming**
- Applied **A* & triangulation** algorithms on Google Maps to plan safe paths

PHORMATICS 📄 | Jupyter Notebook

- **Computer vision** gym trainer using **pose estimation** to critique workout form
- Designed custom **cloud computing** flask architecture with **WebRTC** stream

BATTLE TETROMINO 📄 | Java

- Applied low-latency websockets to a multiplayer Tetris game & chat room
- AI trained with a **genetic algorithm** using supervised heuristic optimization

LEADERSHIP

FOUNDERS NETWORK | VP Education

Since Sept 2017

- Hosting workshops & writing curriculum on machine learning and other CS topics for hundreds of students as part of the largest tech club on campus
- Acquired \$11K from IBM / CIBC for Canada's largest tech case competition
- Authored case study by testing viability of IBM Watson using the **Java SDK**

COMMUNITECH | Campus Ambassador

Since May 2018

- Directing the largest Canadian tech accelerator's Code to Win competition
